

## **Association Meetings**

November 17, 1988

### **Kentucky Public Transit Association**

*The Kentucky Public Transit Association is committed to the maintenance and improvement of services to transit systems of all sizes in both urban and rural portions of the Commonwealth.*

The Association held its annual meeting at the Forum to elect new officers for the coming year. Dwayne L. Stice, general manager of the Paducah Area Transit System, was chosen president. Other officers also were chosen.

### **Kentucky Port and River Development Commission**

*The Kentucky Port and River Development Commission was created by the 1966 Kentucky General Assembly to provide advice, counsel, and assistance to the local riverport authorities.*

The Kentucky Port and River Development Commission held its quarterly meeting and reviewed project applications from three riverports. The Commission recommended funding for a railport intermodal development project at Hickman-Fulton Riverport.

### **KyTC Young Engineers sponsored by Kentucky Association of Transportation Engineers**

*The Kentucky Association of Transportation Engineers is organized to promote the fellowship, cooperation, and social and economic welfare of its members, to advance the professional reputation of Kentucky transportation engineers, to promote employment practices for transportation engineering in state government, and to promote the public interests that are affected by the services of transportation.*

This question-and-answer session was directed at young engineers with less than 10 years' experience with the Kentucky Transportation Cabinet. The meeting provided an opportunity for Cabinet officials to encourage young engineers in seeking a future with the Cabinet, especially in light of the many recent retirements. Secretary Bryant announced salary increases for entry-level engineering positions.
